THE PRESIDENT'S MESSAGE.

President HARRISON's message, presented to Congress to-day, is a very carefully prepared document. It treats with more or les detail many important questions. Running through it is the evident satisfaction of the writer at the successful way in which he states the affairs of the Government bave

"Gratifying," "satisfactory " and "increasingly satisfactory," are of frequent rerrence, and are used in reference to the affairs of state. In several instances Mr HARRISON comes out fint-footed, notably in true patriot, why does he not retire? regard to the passage of the Shipping Bills, a National Bankrupt Law, the Copyright Law and the Force Bill.

On many other important matters, how ever, he is non-committal. He recommends closer scrutiny in passing pension bills, and urges that appropriations be absolutely free from prodigality.

In the matter of reciprocity he rather indorses Mr. BLAINE, whom he also pats on the shoulder in the paragraph on foreign relations, of the conduct of which Mr.

HARRISON expresses approval. The census question is passed by with a seemingly careless but thoughtfully prethe President says that it is good, but thinks that time is needed to make this apparent. To reopen the question he be-

lieves would be both unwise and imprudent.

Mr. HARRISON occupies some space in straightening himself out in regard to State

THIS MONTH.

December is here, and in about three weeks Christmas will be at hand. These weeks will pass very rapidly for everybody except the child who is longing to hang up stocking for Santa Claus to fill, on Christmas tree which will bear tine fruit for

Do not forget one Tree which is to grow and bear fruit for the benefit of poor children. It is the kind hearts of others which will rear this Tree and deck its spreading branches with beautiful objects yours, gentle reader, will make for the little ones who will flock delightedly around THE EVENING WORLD's Chrismas Tree.

Remember this now and send what your object. All charity is wondrously fair, but to pour sunshine and gladness, even for one day, into the hearts of poor children is a particularly attractive act of humanity.

Send, then, promptly, what you can to belp on THE EVENING WORLD's Christmas Tree. You will add another joy to your and girls who know such few joys. When you see the contented faces of your own little ones on Christmas Day, it will be a comfort to you to know that through your tenderness toward other less fortunate children, the day is a bright and happy one for

THE CRUELTY OF BUSPENSE.

It is hard for a human being to remain for days, to remain even for hours, in a state of awful suspense. Not to know what walts one in "a matter of life or death " cannot but cause an agonizing state of feeling. The colored murderer Wood has had a ray of hope fall across his path and has been rescued from the very death chair when the dynamo was in readiness to send its death message through his trembling frame.

The man was quiet and resigned when the darkness of death seemed irremediably settled upon him. But the lease of life which his counsel has craftily secured for him threw the poor wretch into an eestasy of delight. The immediate pressure was removed and dim prospect of rescue from his doom has made him thrill with the bounding pulses of hope.

It is a pity that trials cannot be conducted so that when the solemn death sentence is passed there may be a certainty that there

is no longer any shade of hope. What benefit is it to this poor negro to pass a few more days in his cell, if again shadow of death must fall upon him

and his life is to go out in the fatal chair? CHRISTMAS SHOPPING.

It is a long-headed thing to make one's urchases for Christmas now. The shops have gotten their assortment of holida goods well in by this time, and the early comer has a larger field from which to glean the useful or ornamental objects which are to be presented to friends or relatives at the Yule-time festivity.

The week immediately before Christma sees the shops packed with shoppers until it is almost impossible to circulate through the crowds. The counters are crowded, and there is no chance to inspect the thoroughly and comfortably.

The reports are of a very contradictory character, but no one can question the wisdom of increasing the troops and massing them in the points most exposed to attack from the Indians. The country has had enough Indian massacres to do without another for the whole term of its national existence.

UNPLEASANT.

How the railroad felt last year as it calmly pocketed fourteen cents beyond what the law allows of its passengers to Morris Park need not be inquired into. But how it will feel in disgorging tens of thousands of dollars to passengers for having illegally grabbed their fourteen cents may easily be conjectured.

There will not be very much sympathy felt for it under the circumstances, and the shrewd lawyers who discovered this little obliquity in the road have every right to turn an honest penny by their discovery.
